BLACK FORCE

Setting your code:

Black Force padlocks are set to '0000' as standard from the factory

Whilst the code is set to '0000' lift up the shackle and rotate it 180 degrees

Push the shackle down into the padlock body

With the shackle pressed in lay the padlock flat to reveal the code change screw in the horizontal position

Using a flat screwdriver rotate the screw 90 degrees (Vertical)

Rotate the dials to the desired code

Return the code change screw to the original position (Horizontal) by rotating the screw 90 degrees

Return padlock to a vertical base and raise the shackle from the padlock body

Rotate the shackle back 180 degrees and now the 'New' code is set. To change the code again please repeat steps above.
